

Minnesota Gubernatorial General Election Turnout by Age

Total turnout shows, for each age group, voters in an election as a percentage of estimated population. Voter history data is from Statewide Voter Registration System. Voters with unknown age were removed from this analysis. Yearly population estimates from US Census. Population estimates do not account for all voter eligibility factors. 2018 chart uses the 2017 population estimate, which is the most up-to-date data currently available. It will be updated after the 2018 estimate is available. 2010 had a very small amount of mail ballot voting. Data table available at <https://www.sos.state.mn.us/election-administration-campaigns/data-maps/historical-voter-turnout-statistics/>
